DETAILED ACTION

Allowable Subject Matter

1. Claims 1-18 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior arts fail to disclose, suggest, or in combination of a communication unit having a plurality of coupling resistor sections which are laid out between ground and power layer sections, and couple adjacent ones of a plurality of conductive layer sections with each other, and a plurality of communication elements which are respectively associated with a plurality of conductive layer sections, transmit information by changing electric potentials of said associated conductive layer sections to said ground layer section, and acquire said transmitted information by detecting changes in electric potentials to be propagated to those conductive layer sections which are adjacent to said associated conductive layer sections through any of said plurality of coupling resistor sections (claim 1), and a first communication element section which changes an electric potential of first conductive layer section to a ground layer section in accordance with information to be transmitted; and a second communication element section which acquires said transmitted information by detecting a change in electric potential to be propagated to said second conductive layer section through said coupling resistor section as said electric potential of said first conductive layer section to said ground layer section changes (claim 2).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

2. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Yukuta, Kwong et al, Wu et al., Tran, Lockwood et al., Akiba et al., Harada et al., Steigerwald et al., and Archambeault disclose related art.
